Reference Number Supplier		
Acceptance Supplier		
Date of Acceptance		(dd-mm-yyyy)

Revision	Change Description	Refers To
01	Initial document, based on PSP-7605809-04 and MR 6631. Pump head changed.	
02	Agreed deviations added. Exact description of change in pump compared to previous described in Grundfos "ECD" document dates 18 th april 2018. At BDR this ECD document can be found in PSP revision "References" folder.

1 Part services and summary

1.1 Purpose

The purpose of this document is to describe the operational requirements that the part has to fulfil and the environments the part is exposed to. The document is created at the birth of part and maintained through the whole life cycle of the part.

1.2 Scope

The product will be applied in a gas condensing wall-hung boiler up to 110 kW (Hi). It takes care of the circulation of central heating (CH) water. When the boiler is in "Domestic Hot Water (DHW) operation, the pump circulates the water through a heat exchanger or external boiler for DHW.

1.3 Acronyms, Abbreviations and Definitions

Explanation of all acronyms, abbreviations and definitions used in this document are stated here:

Acronym or abbreviation	Description
PWM	Pulse Width Modulation
H _i	Net Caloric value (inferior)
RH	Relative Humidity
mbar(a)	Absolute pressure
L _{WA}	Sound power level
DAF	Dry and Air Free
l _n	Normal litres (@p _{atm} = 1013 hPa and T = 288 K)
m ³ _{st}	Standard cubic meter (@p _{atm} = 1013 hPa and T = 273 K)

Item	Rev.	Release Status	Date of Issue	Page No.
7724382	02	Production	14-Jan-2019 12:56	2 of 14

Definition	Description	Agreed deviation
Environment	Surrounding of the specified part.	
Gas	- The gas input can vary within the complete 2nd and 3rd gas family according to EN437 in all European countries including UK, with the knowledge that UK gas contains additives like MEG, DEG and TEG (Mono-, Di- and Tri-Ethylene Glycol). See G.I.S.E6:2006 (Gas Industry Standard) - Gas according to Dutch NTA 8837. - The gas can contain particles $\leq 50 \mu\text{m}$.	
Air	- With a pollution degree of 3 as defined in EN 60664. - Particulate matter with size 10 micron in diameter (PM10) $50 \mu\text{g}/\text{m}^3$ max. - Other air quality aspects according to directive 2008/50/EG.	
Gas air mixture	- A mixture of air and gas in the ratio λ (lambda). $\lambda = 1.0$ means that there is exactly enough air for complete combustion of the gas (stoichiometric combustion). $\lambda = 1.5$ means that there is 50% more air than necessary for the combustion.	
Flue gas	Flue gas formed during the combustion of the gas air mixture. Flue gas can contain the following components: O_2 CO_2 CO NO_x N_2 H_2O C_xH_y Cl SO_2	
Condensate	- Fluid formed during the condensation of flue gas. - Concentration of the components in the condensate is dependent on the gas type used,	

Item	Rev.	Release Status	Date of Issue	Page No.
7724382	02	Production	14-Jan-2019 12:56	3 of 14

	flue gas situation, etc., so the concentration data can only be regarded as indicative. • The pH value of the condensate is ≥ 1. • Due to the combustion, concentrations can occur like listed below: ○ $\text{SO}_4^{2-} \leq 152 \text{ mg/l}$ ○ $\text{NO}_3^- \leq 424 \text{ mg/l}$ ○ $\text{NO}_2^- \leq 0.6 \text{ mg/l}$ • Due to aluminium heat exchanger and chimney systems, concentrations can occur like listed below: ○ Aluminium $\leq 70 \text{ mg/l}$ ○ Cadmium $\leq 1 \text{ }\mu\text{g/l}$ ○ Chrome $\leq 250 \text{ }\mu\text{g/l}$ ○ Copper $\leq 160 \text{ }\mu\text{g/l}$ ○ Lead $\leq 10 \text{ }\mu\text{g/l}$ ○ Nickel $\leq 60 \text{ }\mu\text{g/l}$ ○ Iron $\leq 3.1 \text{ mg/l}$ ○ Tin (Sn) $\leq 150 \text{ }\mu\text{g/l}$ ○ Zinc $\leq 3.3 \text{ mg/l}$	
System water	From clear mains water to water polluted with chemical compounds, bacteria, and particles from 0.1-22mm (e.g. building materials, installation materials and flakes of magnetite, flux and scale). System water can contain the following components: • Magnetite $\leq 5 \text{ g/l}$ • Flux $\leq 2,5 \text{ g/l}$ • Chloride $\leq 100 \text{ ppm}$ • Calcium $\leq 125 \text{ ppm}$ • Sodium $\leq 20 \text{ ppm}$ • Potassium $\leq 10 \text{ ppm}$ • Magnesium $\leq 10 \text{ ppm}$ • Aluminium $\leq 5 \text{ ppm}$ • Iron $\leq 100 \text{ ppm}$ • Copper $\leq 2 \text{ ppm}$ • Zinc $\leq 5 \text{ ppm}$ • Boron $\leq 2 \text{ ppm}$ • Phosphorous $\leq 80 \text{ ppm}$ • Nitrate $\leq 25 \text{ ppm}$ • Sulphate $\leq 50 \text{ ppm}$ • Phosphate $\leq 5 \text{ ppm}$ • Silica $\leq 10 \text{ ppm}$	

Item	Rev.	Release Status	Date of Issue	Page No.
7724382	02	Production	14-Jan-2019 12:56	4 of 14

	Ammonium ≤ 1 ppm The conductivity will be less than 900 $\mu\text{S}/\text{cm}$ @ 20°C.	
Domestic water	Domestic water for human consumption according Directive 98/83/EC and the WHO Guidelines for Drinking-water quality, 2011. - Hardness: 1 - 36°dH (German hardness) - pH: 6.5 - 9.5 - Chloride: 0 - 250 mg/l - Chlorine: 0 - 5 mg/l

1.5 Part Perspectives

This pump replaces the previous Grundfos UPML 25-105 130 PWM (7605809) currently in use in the Quinta 85 and Quinta 110 (among others).

2 Operational requirements

2.1 Input requirements

2.1.1 Operational media

Description	Requirement	Agreed deviation
2.1. Air	See §1.3 for definition	
2.2. Gas	See §1.3 for definition	

2.1.2 Conditions of the media

Description	Requirement	Agreed deviation
2.3. Pressure	Normal medium pressures: 0 – 3 bar relative pressure Extreme medium pressures: 1,5 – 4 bar relative pressure Maximum short term conditions: 1,5 – 4 bar relative pressure	
2.4. Temperature	According time/temperature profile in figure 2.1. • Normal medium temperatures: 0 – 82,5°C • Extreme medium temperatures: 82,5 – 95°C • Maximum short term conditions: >95°C	
2.5. Hardness	1 – 36°dH (Germany hardness) Above 15°dH water treatment could be applied.	
2.6. pH	5 - 11	5 - 10

Item	Rev.	Release Status	Date of Issue	Page No.
7724382	02	Production	14-Jan-2019 12:56	6 of 14

2.7. Additives	Additives and inhibitors are used according to the manufacturer's manual Regular additives and inhibitors used in heating systems in Europe and Northern America, including: • Water with a maximum of 40% of glycol • Fernox additive and inhibitor ranges • GE Sentinel additive and inhibitor ranges	
2.8. Cleansing materials	Applicable cleansing materials for CH systems are used according to the manufacturer's manual Regular cleansing materials used in heating systems in Europe and Northern America include: • Fernox ranges of cleansing materials • GE Sentinel ranges of cleansing materials	

Item	Rev.	Release Status		Date of Issue	Page No.

Figure 2.1: Time/temperature profile

2.1.3 Functional

Description	Requirement	Agreed deviation
2.9. Maximum running dry time	Minimal 3 x 20 seconds during lifetime for new pumps, bearings greased with glycerin Minimal 1 x 10 minute during lifetime with water in rotor room	
2.10. Leakage	Pump has to be watertight for the lifetime	
2.11. Test pressure	2.0 bar relative pressure with air Leakage $\leq 20 \cdot 10^{-9} \text{ m}^3/\text{s}$	40 mm^3/s @ 2,0 bar relative pressure with air
2.12. Capacity of the pump	Head at 0,0 m^3/h : min 10,1 m H_2O Head at 4,6 m^3/h : min 4,1 m H_2O Head at 3,6 m^3/h : min 3,0 m H_2O Manufacturer QH chart in figure 2.2	

Item	Rev.	Release Status	Date of Issue	Page No.
7724382	02	Production	14-Jan-2019 12:56	8 of 14

Figure 2.2: QH chart

2.13. Jamming	Pump does not jam in production and after installation of the boiler	
2.14. Rotor	Rotor may not rub the anchor, causing unacceptable noise	
2.15. IP-class	IP X4D	IPX2D
2.16. Sound power levels	Max A-weighted sound power levels ($L_{w(A)}$) are ≤ 40 db(A) over the whole working range of the pump. No annoying sound from the electronic parts allowed.	
2.17. Lifetime	≥ 15 years according to the time / temperature profile in figure 2.1 ≥ 16.000 h at 95°C medium temperature	

Item	Rev.	Release Status	Date of Issue	Page No.
7724382	02	Production	14-Jan-2019 12:56	9 of 14

2.1.4 Electrical

Description	Requirement	Agreed deviation
2.18. Power of the pump	Manufacturer power chart in figure 2.3	
2.19. Efficiency	Manufacturer efficiency chart in figure 2.4	

Figure 2.3: Power chart

Figure 2.4: Efficiency chart

Item	Rev.	Release Status	Date of Issue	Page No.
7724382	02	Production	14-Jan-2019 12:56	10 of 14

2.20. Energy efficiency index (EEI)	The required EEI is $\leq 0,23$ (ref. EN 641/2009 – annex I, chapter 1, sub 2)	
2.21. Inrush current	Maximum inrush current is 25 A	See Grundfos “ECD” document dated 18 th April 2018. At BDR this document can be found in PSP revision “References” folder for test method and outcome.
2.22. Electrical insulation	According Low Voltage Directive (2006/95/EEC)	
2.23. Power supply	230 VAC (+10% / -15%) 50 Hz (± 2 Hz)	
2.24. Pump response at PWM step & Power On	Target reached at power ON: max 3,3 sec Target reached at speed change: max 1,0 sec	
2.25. Pump speed control	Pump will be driven by/must be compatible with: PWM Open collector output with 2k2 series resistor, frequency=100-4000Hz, supply voltage 4-24V (max peak=36V) See Appendix A

3 Environments

3.1 Operation environments

The part is exposed to the following operational environments:

Description	Requirement	Agreed deviation
3.1. Temperature of surrounding	0 – 70°C	0 – 55°C
3.2. Humidity of surrounding	0 – 95%, excluding condensation	

3.2 Transport and storage environments

The part is exposed to the following transport and storage environments:

Description	Requirement	Agreed deviation
3.3. Temperature of surrounding	-20 – +60°C without water inside the pump	
3.4. Humidity of surrounding	0 – 95%, excluding short term condensation during ambient temperature changes	

Item	Rev.	Release Status	Date of Issue	Page No.
7724382	02	Production	14-Jan-2019 12:56	12 of 14

4 Standards Compliance

4.1 General

This section contains a summary of all standards with which the part must comply. Each standard is listed as a specific requirement.

4.2 Standards

The part shall comply with directives and normative references below. If no revision is mentioned the latest revision applies. However, this document can refer to a specific revision.

Directive	Description
1907/06/EC	Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)
2008/50/EG	New air quality directive
2011/65/EU	Restriction of the use of certain Hazardous Substances in electrical and electronic equipment (RoHS)
2012/19/EU	Waste Electrical and Electronic Equipment (WEEE)
2014/30/EU	Electro Magnetic Compatibility Directive (EMC)
2014/35/EU	Low Voltage Directive (LVD)
98/83/EC	Drinking Water Directive
Regulation (EU) 2016/426	Gas Appliance Regulation (GAR)
2009/125/EC	EuP/ErP Regulation for standalone/integrated circulators produced and sold in the EU.
2009/641/EC	Ecodesign requirements for glandless standalone circulators and...etc

Normative references	Description
EN 15502-1:2012+A1:2015	Gas-fired heating boilers - Part 1: General requirements and tests
EN 15502-2-1:2012+A1:2016	Gas-fired central heating boilers - Part 2-1: Specific standard for type C appliances and type B2, B3 and B5 appliances of a nominal heat input not exceeding 1000 kW
ISO 3743, 4871 and 9614	Acoustics
EN 55014	EMC capabilities, 55014-1: emissions, 55014-2: immunity
EN50165	Electrical equipment of non-electric heating appliances
EN60335-1	Degrees of protection provided by enclosures
EN60335-2-51	Electrical safety

In case of conflicting references, the latest version applies
